INFECTION PREVENTION AND CONTROL

For all workers, regardless of specific exposure risks, it is always a good practice to:

- Frequently perform hand hygiene with either alcohol-based hand rub with at least 60% alcohol or wash hands with soap and water for at least 20 seconds. Always wash hands that are visibly soiled.
- Avoid touching your eyes, nose, or mouth.
- Avoid close contact with symptomatic persons unless wearing PPE or they’re wearing a surgical mask.

ISOLATE symptomatic suspected or confirmed COVID-19 cases immediately.

LIMIT SPREAD of person’s infectious respiratory secretions by providing a surgical face mask to symptomatic patients.

SEPARATE suspected cases from confirmed cases.

RESTRICT number of personnel entering isolation areas.

PROTECT workers in close contact (within 1.5m), environmental cleaning & cleaning shared equipment.
