

VISION

Safety is everyone's business

SYSTEM GOALS

CEC STRATEGIC PRIORITIES

Embedded safety systems

A safety model where the whole system is strategically enabled through governance, partnerships, roles and responsibilities, and capability and capacity.

Safety culture with accountability

The whole system, from boards to front-line staff, are enabled to lead positive safety cultures and improve performance in all settings.

Safety priorities and programs

Targeting priority patient populations and service areas with programs, tools, resources, and safety expertise, while maintaining flexibility and agility to respond to urgent needs.

Safety intelligence

Triangulated data, connected technologies and near real-time insight enables a predictive and proactive approach to safety.
